

Lecture 31 — Live Kernel Patching

Jeff Zarnett

2026-05-30

Placeholder

This lecture has not yet been written. The detailed outline lives in the plan file `let-s-look-at-containers-structured-sprout.m`.

The intended sections are:

1. What's hard about hot-patching
2. ftrace as the patching backbone
3. The historical pair — kpatch vs. kGraft
4. The consistency model
5. Shadow variables
6. What live patching can't do
7. Tooling
8. Live patching as fail-soft
